John:

I forgot to attach the Central Wire certification to the response to EPA comments email that I sent this morning. It is attached to this email.

Regards,

Jack

Subject: Response to EPA Comment Letter on Central Wire Geoprobe Data Submittal of 11/14/2014

John:

Central Wire's response to EPA's comments on our November 14, 2014 Geoprobe data submittal is attached to this email. It includes the physical sampling stabilization data for the sampling locations collected prior to the analytical sampling at each of the Geoprobe locations and depths in response to your first comment.

We have attached a revised plot that shows the symbols of the GP-3I TCE samples that are consistent with the Legend in response to your comment 2.

Central Wire has prepared and attached a figure that has identified GP-23 at 150 feet northwest of GP-8 and GP-24 which is 150 north of GP 19 as additional Geoprobe locations in response to EPA's 3rd comment and our telephone conversation last week. GP-23 and GP-24 are planned to be sampled on December 29, 2014.

Please call me with any questions or comments.

Regards,

Jack
